Continuation of 2. NOTE: the proposed amendment would change the claimed surface area from 15-200 square meters per gram to 15-115 square meters per gram, which would be a new issue requiring further search and/or consideration.

Continuation of 5. does NOT place the application in condition for allowance because: It is argued throughout the the claims, as amended, would be allowable. This is not persuasive because the proposed amendment has not yet been entered. It is argued that with respect to the Examiner's comment that the evaporation of ethanol and water in the Kim et al... to form titanium oxide. This is not persuasive because Applicant merely claims a "vapor phase process", which is broadly construed as any process employing the vapor phase. Claims must be given their broadest reasonable interpretation. In re Morris, 127 F.3d 1048, 1054-55 (Fed. Cir. 1997). It is noted that the features upon which applicant relies (i.e., a process wherein specific "starting materials are in the vapor phase and react with eachother") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The claims are not allowable and Applicant's further arguments are not persuasive for reasons already of record.
